REDS™

STATEMENT

Green at the core.

One color carries the brand: a single, deliberate green, set against black and off-white. Every other hue in this system exists to serve it - never to compete with it.

GREEN 60 — THE BRAND HERO:

#0BDA51

FOUNDATION — BLACK:

#292929

FOUNDATION — OFFWHITE:

#F6F6F3

SPECIFICATIONS

Green – full scale

Ten tonal steps generated from the brand hero, #0BDA51 - Green 60. Used to build depth, hierarchy and state without introducing new hues.

Family & combinations

The color family subdivides cleanly for smaller applications. Always drop from the warm end first. Green stays present at every step.

SECONDARY FAMILY

GREEN
#0BDA51

TEAL
#1FBF8A

BLUE
#0B8793

BLACK
#292929

OFF-WHITE
#F6F6F3

COMBINATIONS

1—COLOR – GREEN ONLY

2—COLOR – GREEN, TEAL

3—COLOR – GREEN, TEAL, BLUE

COMBINATIONS TO AVOID

FUNCTIONAL

Functional color – Red & Amber

Reserved exclusively for system feedback error and warning states. Never used decoratively, never adjacent to Green.

RED — ERROR SCALE

100	90	80	70	60	50	40	30	20	10
#350D11	#581319	#811821	#A81F2A	#D32735	#DE4F5B	#E47CB4	#EBA8AD	#F3CED1	#FAEBEC

AMBER — WARNING SCALE

100	90	80	70	60	50	40	30	20	10
#3A2909	#60440B	#8B610E	#B67F11	#E5A015	#ECB341	#EFC571	#F3D7A0	#F7E8CA	#FBF5E9

NEUTRALS

Neutral – Cool & Warm

Two neutral moods, matched step for step. Cool Gray carries a faint blue cast; Warm Gray a faint red-brown cast. Choose one mood per application - never mix them.

COOL GRAY — HUE 220°

WARM GRAY — HUE 30°

DON'T

NO FOREIGN HUES:

Never blend outside the Green-Teal-Blue family (e.g., no purple, red, or yellow).

NO EXTREME TONAL JUMPS:

Do not skip >4 tonal steps (e.g., Green directly to Off-White #F6F6F3).

NO WARM GRAY GRADIENTS:

Warm Grays (Hue 30°) carry red-brown undertones that clash with Green; keep them solid.

NO NEUTRAL MIXING:

Never blend Cool and Warm Grays in the same transition or layout.

CONTRAST

Contrast & Accessibility

Guidance on which text/background colour pairings meet WCAG AA contrast standards (4.5:1 for body text). Use this reference when applying secondary and functional colours to ensure legible, accessible content.

Typography

Our typefaces

Sora and Source Sans 3 are final. Sora carries headlines and display moments; Source Sans 3 carries body copy and UI text.

Headlines

Sora

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789

Body & UI

Source Sans 3

ABCDEFGHIJKLMNOPQRSTUVWXYZ

abcdefghijklmnopqrstuvwxyz

0123456789

Type scale formula

Our scale is built from a single base size and a repeating step function, so every heading and label stays proportional at any size. The base assumes a 12pt starting point.

Sora 12px

Sora 14px

Sora 16px

Sora 20px

Sora 24px

Sora 32px

Sora 42px

Sora 48px

Sora 60px

Sora 84px

Type scale formula

FONT SIZE	TOKEN / ROLE	UI COMPONENT MAPPING
84px	Display / Hero	Main landing page hero headline
60px	H1	Major section / page titles
48px	H2	Primary section headers
42px	H3	Modal titles, feature headings
32px	H4	Subsection titles, large card headers
24px	H5 / Title	Standard card titles, widget headers
20px	H6 / Subtitle	Card subtitles, prominent list headers
16px	Body Lead / Button	Primary body text, button labels (Sora, Semibold)
14px	Body	Standard body copy, table content
12px	Caption / Label	Form field labels (uppercase), navigation items, helper text

Type scale & line height

Line height increases as text gets smaller and tightens as it gets larger. Use the pairing below rather than picking leading by eye.

Size (pt/px)	Line Height (pt/px)	Proportional Gap	Application Level
12	16	+4px	1x (Screen / UI)
14	18	+4px	1x (Screen / UI)
16	22	+6px	1x (Screen / UI)
20	26	+6px	1x (Screen / UI)
24	32	+8px	1x (Screen / UI)
32	40	+8px	1x (Screen / UI)
42	50	+8px	1x (Screen / UI)
48	52	+4px	1x (Screen / UI)
60	64	+4px	1x (Screen / UI)
84	88	+4px	1x (Screen / UI)
96	128	+32px	4x (Environmental / Signage)
108	116	+8px	Formula Step
136	148	+12px	Formula Step
168	180	+12px	Formula Step
192	256	+64px	8x (Hero Digital Signage)
204	216	+12px	Formula Step
244	256	+12px	Formula Step
288	300	+12px	Extended Display

Large formats

The farther away someone stands, the smaller our type looks — even if the file is the same size on your screen. A label that reads fine on a laptop disappears on digital signage or event displays. To compensate, multiply the point size (and line height) by the same factor at every step-up, using the scale you already picked for that piece of type.

1x — Handheld & Screen

Mobile apps, web platform, desktop dashboards (1x scale)

4x — Environmental & Exhibition

Wayfinding, kiosk displays, booth signage (4x scale)

8x — Large Scale Digital Signage

Hero billboards, venue projections, backdrop displays (8x scale)

Tracking

Sora is drawn tight; give headlines a touch of letter-spacing so they don't clump — but don't overdo it, or the letters lose intent and fall apart.

REDS

REDS

(No letter-spacing / clumped)

R E D S

(Over-tracked / spaced out)

Leading

Tight leading on a big headline reads as confident. That same tightness on a paragraph makes it exhausting to read. Loosen up as the type gets smaller.

REDS builds high-performance digital experiences, security platforms, and unified design ecosystems.

REDS builds high-performance digital experiences, security platforms, and unified design ecosystems.

REDS builds high-performance digital experiences, security platforms, and unified design ecosystems.

REDS builds high-performance digital experiences, security platforms, and unified design ecosystems.

Punctuation

Correct marks read as intentional. Straight quotes and hyphens standing in for their curly, longer counterparts read as a typo.

Apostrophes

Use a curly apostrophe for possessives and contractions. Use straight primes only for feet, inches, minutes and seconds.

REDS’ platform

~~REDS' platform~~

Quotes

Use left and right curly quotation marks. Avoid the straight quotes left over from typewriters.

“Seamlessly integrated.”

~~"Seamlessly integrated."~~

Em dash

Use the em-dash to set off a strong aside. Hyphens (-) and double hyphens (--) are not substitutes.

REDS — now in version two —
elevates digital brand experiences.
